Subject: Hartford Conn.
Geodetic Survey

Mr. Porter H. Barrows
City Engineer
City Hall
550 Main Street
Hartford, Connecticut

Dear Mr. Barrows:

On March 23, 1960 I provided your office with photostat copies of our cards describing Connecticut Geodetic Survey Stations Numbers 3182 and 3189, our tie points to triangulation Station "Fuller".

In June 1960 we found it necessary to revise our "Fuller" tie due to an erroneous tape calibration used in our original work. I am enclosing herewith copies of the cards describing all Connecticut Geodetic Survey stations the values of which were revised on the basis of the revised tie to "Fuller". Will you kindly substitute these for the copies which were earlier sent to your office.

Very truly yours,

Howard S. Ives
State Highway Commissioner
